Stabilizer Seminar

Saturday, March 13 from 1:00—3:30

Fee \$15

Marje Agostini

Finding the right combination of thread, fabric and stabilizer to create the perfect embroidery can be time consuming. Tossing in variables such as the designs density or lack of, the garments thread count, how tight your bobbin was wound, and the needle type can all contribute to how the end result looks and if we are happy with it! This seminar will answer the stabilizer questions. It will provide guidance on which stabilizer to use and when.

I feel like stabilizing your garment or the item to be embroidered with the correct stabilizer is the first step to perfect embroidery. You want the item to remain beautiful through everyday wear and tear. Especially after all your hard work and creativity!

This seminar will help you get perfect results every time.
